

2026 EESP Kickoff: Residential Offerings

Kara Jonas | Senior Manager
Residential Energy Efficiency, ComEd

Program Offering Overviews

Residential

- Home Energy Savings
- Multi-Family Energy Savings
- Whole Home Electric
- Home Heating & Cooling

Commercial & Industrial (C&I)

- Standard
- Small Business
- Instant Discount
- Illinois Commercial Food Service
- Custom
- Industrial Systems
- Retro-Commissioning (RCx)

Additional Tools & Offerings

- Customer Eligibility
- Business Energy Analyzer
- Facility Assessments
- C&I New Construction
- Strategic Energy Management
- Beneficial Electrification

**THANK YOU
FOR A STRONG
2025!**

2026 Residential Highlights

The Start of a New Plan!

- 2026 is the first year of a new energy efficiency plan, and as such, some offerings have increased or decreased budgets and savings targets. For example:
 - Reduced budget to Home Energy Savings
 - Increased budget to Whole Home Electric
- There were also some program design changes, such as:
 - Elimination of Market Rate elements from Home Energy Savings, Multi-Family Energy Savings offerings
 - Shifting electric resistance to heat pump retrofits to Whole Home Electric

The team will talk through these changes in more detail today.

Key 2026 Commitments

- Allocating:
 - ~\$100M to Income Eligible customer offerings
 - ~\$74M to 'Whole Building' Weatherization offerings
 - Minimum \$27M to Single Family customer offerings
 - ~15% of Whole Building Weatherization budget reserved for health and safety
- 90% of Whole Building Weatherization incentive dollars to be budgeted towards 'Major Measure' categories:
 - All envelope insulation measures (attic/ceiling, wall, basement wall, rim/band joist, floor above crawl space)
 - Comprehensive air sealing (blower-door guided)
 - Duct sealing and/or insulation
 - Heat pumps and Heat pump water heaters
 - Urgently needed furnace, boiler, fossil fuel water heater, and/or central A/C replacements
 - Window/room A/Cs
 - Furnace blower motors
 - Major appliances (washers, dryers, induction stoves, fridges, freezers)
 - Health and safety measures
- Electrification savings cap increases to 10%; 25% of savings must come from income eligible customer segment.

Questions

Kara Jonas | Senior Manager, Energy Efficiency
ComEd

Home Energy Savings

Leanna McKeon | Senior Program Manager
ComEd

Anthony Villegas | Program Manager
Resource Innovations

Overview and Key Highlights

HES provides a comprehensive set of products and services to help income eligible single-family customers save energy and reduce energy bills

- Serves income-eligible customers in single-family homes, two-flats, condo units, mobile homes, manufactured homes, and townhomes
- Jointly administered by ComEd, Nicor Gas, Peoples Gas & North Shore Gas
- Implementation Contractor: Resource Innovations
- Program components: home energy assessments, retrofits, and weatherization (IHWAP)
- Customer screening and sign-up is via an online tool (EESavings.com) or by calling 1-855-660-9378.
- All measures are free to income eligible customers.

2026 HES Updates

- 2026 budget reduced from 2025
- Heat pumps moving to WHE program
- No Self-Assessment Portal (SAP)* or virtual HEAs

- Only serve Income Eligible customers (<80% AMI)
- Fully joint-funded program
- Only in-home HEAs

- Potential opportunity to braid with Illinois Inflation Reduction Act (IRA) funds

**SAP continuing for MR customers through gas utilities*

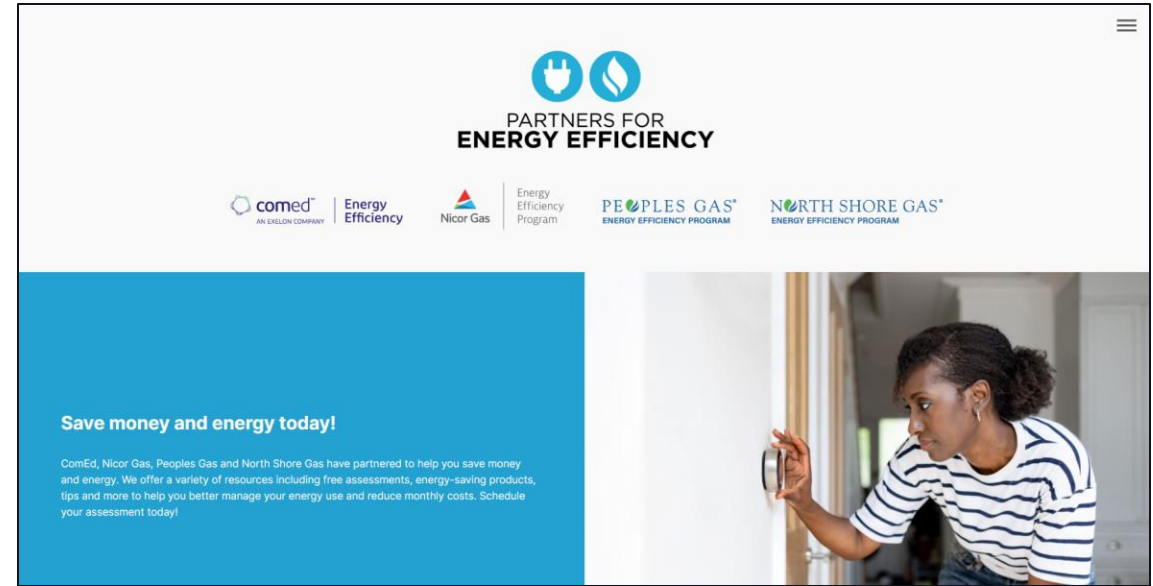

How to Get Involved

- Request for Qualifications (RFQ) are distributed and reviewed at least once a year
 - RFQ respondents should have experience participating in energy efficiency programs, such as utility sponsored programs or IHWAP
- Contractors needed/requirements:
 - BPI Building Analyst – Professional certified Weatherization contractors
 - ICC Energy Efficiency Measures Installer Certification
 - Creating comprehensive and detailed scopes which may include air sealing, insulation, HVAC, health & safety measures and performing ASHRAE and manual J calculations
 - Serve as general contractor providing oversight and coordination to subs if needed
 - Perform final inspections on all work including that of subcontractors, including coordination with third party QAQC
 - Ability to cover all utilities' service territories, if needed

EESP Network Benefits

- Leads are provided by program
- ACH incentive payments
- Closed EESP network
- Program & technical support from RI program team
- Regular individual check-ins
- Trainings
 - Onboarding
 - Program year kickoff
 - Quarterly in-person or remote
- Educational and program offering materials provided
- If you are interested in this offering and would like to receive information on a future RFQ, please email: hesretrofits@resource-innovations.com

The banner features the 'Partners for Energy Efficiency' logo at the top, which includes icons for a plug and a flame. Below the logo are the logos for ComEd, Energy Efficiency, Nicor Gas, Energy Efficiency Program, Peoples Gas, and North Shore Gas. The main text on the left says 'Save money and energy today!' followed by a paragraph: 'ComEd, Nicor Gas, Peoples Gas and North Shore Gas have partnered to help you save money and energy. We offer a variety of resources including free assessments, energy-saving products, tips and more to help you better manage your energy use and reduce monthly costs. Schedule your assessment today!'. On the right is a photo of a woman in a striped shirt looking at a smartphone.

The survey card has a blue header with the text 'Thank you for participating!' and a photo of a family (a woman, a man, and two children) sitting around a table with colorful blocks. Below the photo is a paragraph: 'Thank you for participating in our Home Energy Savings offering. We hope you are enjoying the benefits of your energy-saving and weatherization improvements. If you have any questions about the improvements made to your home, please contact your local community action agency. Visit ComEd.com/HomeSavings or PeoplesGasDelivery.com/Savings to learn about additional ways to reduce energy use, save money and improve your home comfort. We value your feedback! Please complete the survey card below regarding your recent experience.'

Please take this brief survey and mail it to us or complete the survey online. Visit bit.ly/retrofit-survey or scan this QR code.

Email address: _____
Full name: _____

☐ I want to receive emails from ComEd and Peoples Gas about other ways to save energy. The utilities will not share my information with any third party, and I can unsubscribe at any time.

Using a scale of 1 to 5, please rate your level of agreement with the following statements: (circle your response)	Strongly disagree				Strongly agree
My experience applying for energy-saving services was positive.	1	2	3	4	5
The communication process prior to my service was positive.	1	2	3	4	5
The energy advisor who evaluated my home was courteous and professional.	1	2	3	4	5
The installation contractor(s) who completed the work on my home were courteous and professional.	1	2	3	4	5
Overall, I am satisfied with the energy-saving improvements I received.	1	2	3	4	5
I would recommend this offering to a friend or family member.	1	2	3	4	5

Multi-Family Energy Savings (MFES)

Kathryn Hart | Client Manager,
Franklin Energy

Rachel Psolka | Outreach Manager,
Elevate

Overview and Key Highlights

Multi-Family Properties:

- All Customers served through this offering will be Income Eligible
- Buildings with three or more units
- All Public Housing buildings
- Must have active account with ComEd or partner Gas utilities*

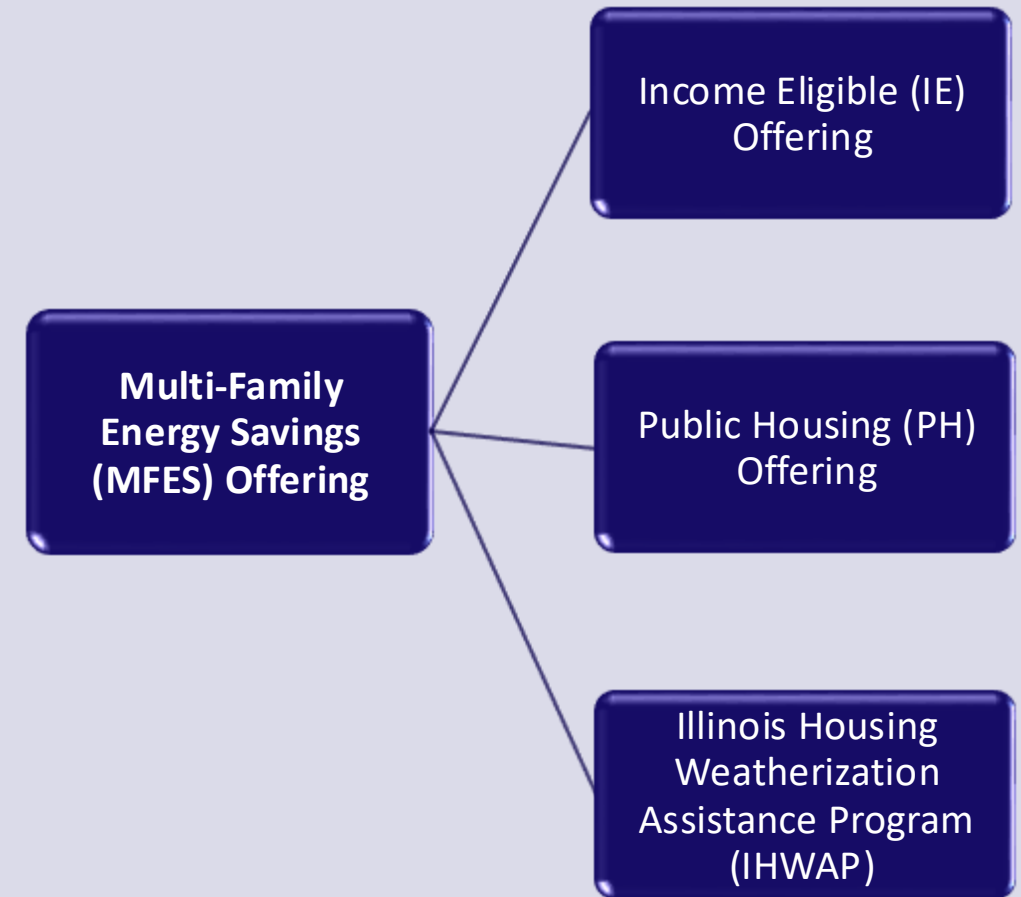

Incentive / Measure Categories:

- Lighting / Electric
- Weatherization
- HVAC / Boilers / Water Heaters
- Health and Safety

2025 Highlights **:

- 9,761 Projects
- 47,637 Customers
- 39,270 MWh Savings
- 1,146,646 Therms

*** Based on the December Year End Forecast*

**Nicor, Peoples Gas, North Shore Gas*

Main Updates for 2026

- **Market Rate incentives are no longer available**
 - Removed from Lighting, Electric, and Weatherization applications
- Online applications through **Navigator** system
- Health and Safety application: increased carbon monoxide/smoke sensors from \$30 to \$40
- Weatherization application: increased attic insulation with air sealing measure baseline from R-11 to R-14
 - Return to 2024 baseline
- Dock door seal and spring loaded garage door hinge measures have been moved from the gas to Weatherization application
- Heat Pump moving to Whole Home Electric (WHE) offering
- All applications: added "electric furnace" to heating system type

EESP Network Details

- Closed network with ongoing registration throughout the year
- Accepting experienced weatherization, HVAC, Lighting EESPs
- Certification Requirements
 - BPI certification for weatherization EESPs
 - Building Analyst-Professional certification
 - ICC certification for electric EESPs
- Projects are generated via program driven leads or by EESP referrals

EESP Benefits

- ACH incentive payments now available
- Online applications
- EESP performance snapshots via email
- Quarterly MFES webinars and trainings
- In-person EESP round table discussions
- EESP networking events
- Survey questionnaires
- Project lead supports project from inception to completion
- Email updates
- QA/QC coaching

How to Get Involved

- Complete and sign the participation application prior to submitting any application.
 - Send Certificate of Insurance (COI) and W-9
- Illinois Commerce Commission (ICC) re-registration by June 1, 2026
 - EESPs need to be ICC certified to get paid for their work

IHWAP Onboarding process

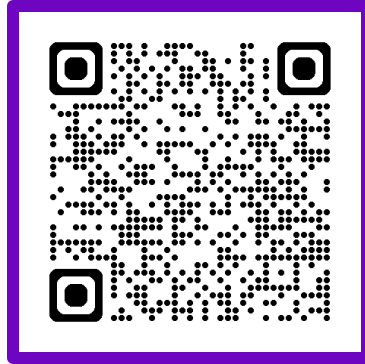

- Complete pre-qualification
- Define service territory
- Sign contract with agency(s) in territory your firm can provide service
- [List of Community Action Agencies](#) (CAAs)
 - *EESPs should ask if the agency participates in Multi-Family IHWAP*
- Complete trial project

Where to get more info

- Project applications and other marketing materials:
 - Reach out to Rachel Psolka or your assigned Project Lead
- ComEd Multi-Family website
 - ComEd.com/Multifamily
- Contractor page
 - [Multifamily Contractor Portal](#)

Whole Home Electric

Scott Grost | Resource Innovations
Danielle Munroe | ComEd

Overview and Key Highlights

- Single offering serving residential income eligible single family and multi-family property types as well as buildings owned or managed by a public housing authority.
- Focuses on converting fossil fueled appliances and heating and cooling systems with efficient electric appliances and systems. Existing electric resistance heating is upgraded to efficient heat pumps.
- Measures include:
 - Heat Pumps
 - Hybrid Heat Pumps
 - Heat Pump Water Heaters
 - Induction Cooking Ranges
 - Heat Pump Clothes Dryers
 - Electrical Panel Upgrades
 - Weatherization
 - Health and safety
- Upgrades are free to qualifying single family customers. Income eligible and public housing multi-family building owners (not tenants) may have a co-pay for certain measures.
- Implemented by Resource Innovations
- 2025 highlights – over 12,000 net MWhs of savings attributed to upgrades in over 200 single family homes and over 170 multi-family tenant units

Main Updates for 2026

- WHE is growing from a \$15 million dollar budget to over \$40 million dollar budget in 2026.
 - Targeting over 370 single family customers served and over 1,000 multi-family tenant units served
- In 2026, WHE will serve electric resistance customers with heat pump upgrades and weatherization as practicable.
- Streamlining and improving our enrollment process by adding an online enrollment option for customers
- Continuing to serve more customers with partial electrification options
- Maximizing the budget's impact by braiding with the City of Chicago's Green Home Chicago program

How to Get Involved

- Closed EESP network identified through Request for Qualifications. 2026 application period is closed. 2027 application period will open around October 2026.
- EESPs interested in acting as a subcontractor to the current 2026 WHE EESP network can share their information with RI, and RI will share it out with the current network.
- Focus on diverse contractors serving disadvantaged and rural communities
- EESPs must have the ability to provide comprehensive project execution, including the use of subcontractors as needed
 - Proven experience in heat pump sizing and installation, heat pump water heater installation, electrical panel upgrades and electric appliance installation
 - Ability to conduct comprehensive assessments
 - ICC certification is required
 - BPI certification (Building Analyst – Professional) required for any projects that include weatherization

Home Heating & Cooling

Matthew Sukolowsky | Program
Manager, DNV
Wen Zhang | Sr. Program Manager,
ComEd

Overview and Key Highlights

- The Home Heating & Cooling offering provides:
- Midstream incentives on energy-efficient heat pumps installed in ComEd residential customers' homes. Discount is applied directly at the point-of-sale from enrolled distributors.
 - Downstream incentives via authorized geothermal EESPs installing eligible geothermal heat pumps at ComEd residential customers' homes.
 - Measures and incentives include: (See tables on the right)
 - 2025 highlights – over 62,000 net MWhs of savings attributed just over 6,000 heat pumps and nearly 200 ENERGY STAR® smart thermostats installed.

Midstream Measure	Incentive	Incentive with Smart T	System Requirements
Air Source Heat Pump-Tier1	Up to \$1,400	Up to \$1,475	15.2 SEER2, ≥ 9.4 EER2, ≥ 8.1 HSPF2
Air Source Heat Pump-Tier2	Up to \$2,000	Up to \$2,075	17 SEER2, ≥ 9.4 EER2, ≥ 8.5 HSPF2
Mini Split Heat Pump	Up to \$1,000	Up to \$1,075	17 SEER2, ≥ 9.4 EER2, ≥ 10 HSPF2

Downstream Measure	Incentive	System Requirements
Ground Source Heat Pump-Full Loop (GSHP)	≤ \$6000	≤ 16 EER
Ground Source Heat Pump-Indoor Unit Replacement	≤ \$800; ≤ \$1,200	≤ 17 EER; ≤ 20EER

Main Updates for 2026

- In 2026, heat pump-trained contractors are required to self-attest to training completion. Email confirmation of module and manufacturer training to comed.homeheatingcooling@dnv.com.
- Heat pump trained contractor online training modules are located at: [Heat Pump-Trained Contractor Training Videos on Vim](#)
- Removal of 25C and 25D federal tax credits

How to Get Involved

- Distributors requirements:
 - 2026 Participation Agreement
 - Authorized seller of eligible products
 - Submit within 60 days of installation
 - Program attribution on invoice to contractor
 - Only sell to program heat pump-trained contractors
- Heat Pump-Trained Contractor Requirements:
 - Complete required program training
 - Only purchase through authorized distributors
 - Program attribution on invoice to homeowner
- Geothermal EESP Requirements:
 - Participation Agreement
 - 2026 ComEd EESP application
 - ICC certification
 - Geothermal certification (Geothermal Alliance of Illinois [GAOI], International Ground Source Heat Pump Association [IGSHPA] or equivalent certification)
