

Energy Efficiency Service Provider Quick Start Guide

The ComEd Energy Efficiency Program may complement your business. All Energy Efficiency Service Providers (EESPs) can assess a customer's energy needs and educate them about all offerings, but there are specific offerings that will fit your business based on the services you provide. **Apply here** to participate in the offerings¹ that fit your business to help ComEd customers implement energy efficiency improvements and offer program incentives, discounts and rebates.

	Program Offering										
	Business (Commercial and Industrial)							Residential			
	Technical			Prescriptive				Single and Multi-Family			
	Custom	Industrial Systems	Retro-Commissioning (RCx)	Commercial Food Services	C&I Instant Discounts	Small Business	Standard	Home Energy Savings	Home Heating & Cooling ³	Multi-Family Energy Savings	Whole Home Electric
Services Offered											
Contractor ²											
Building Automation or Energy Management Systems	x					x	x				
Commercial Refrigeration	x					x	x				
Compressed Air	x	x				x	x				
Electrical	x					x	x	x		x	x
Geothermal (requires GAOI, IGSHPA, or equivalent certification)	x						x		x		
HVAC/Variable Speed Drives/Heat Pumps	x					x	x	x	x	x	x
Industrial Refrigeration	x	x									
Insulation	x					x		x		x	x
Lighting	x					x	x	x		x	
Plumbing (including hot water equipment and heat pump water heaters)						x	x	x		x	x
Process Cooling	x	x									
Smart Controls - Lighting, HVAC	x					x	x				
Weatherization (requires BPI certification)	x							x		x	x
Other (Includes all other specialties not listed above)	x						x				
Distributor / Manufacturer											
Commercial Food Service Equipment				x							
Fork Trucks					x						
HVAC					x				x		
Lighting					x						
Energy Services Company (ESCO) and Engineering Firms											
Energy Assessments/Audits	x	x	x								
Monitoring-based Commissioning			x								
Retro-commissioning			x								

1. Most offerings accept applications on a rolling basis. Retro-Commissioning (RCx), Small Business, and Whole Home Electric conduct annual or semi-annual request for qualifications (RFQ).
 2. Including Energy as a Service (EaaS), Energy Services Company (ESCO), Industrial Services, or Rebate Aggregator.
 3. HVAC contractors can participate as heat pump-trained contractors by working directly with a Home Heating and Cooling distributor and completing specific heat pump trainings.

ComEd Energy Efficiency Program Offerings: Business

Brief overviews of the ComEd Energy Efficiency **Business** Program offerings are provided for reference.

Offering	Overview/Customer Segment	Opportunity Identification	Measure Categories	Typical Service Providers
Business (Commercial and Industrial)				
Technical				
Custom	All customers with energy efficiency projects that can't be effectively addressed by other offerings.	Opportunities are identified via a comprehensive assessment performed by service provider or offering energy advisor. Incentives are based on verified savings and can cover up to 100% of project cost.	Lighting, wastewater treatment, IT/data center, and more	Contractors (including EaaS and ESCO)
Industrial Systems	Customers with industrial equipment in-house and high energy use systems.	Opportunities are identified via a comprehensive assessment performed by service provider or offering energy advisor. Incentives are per-unit and/or based upon verified savings and can cover up to 100% of project cost.	Process cooling, industrial refrigeration, compressed air, process equipment, large pumps and fans and water and wastewater treatment	Contractors (including Industrial Services)
Retro-Commissioning (RCx) ⁵	All building types, private and public sectors, with peak demand more than 100 kW.	Opportunities are identified via a fully-funded building commissioning study conducted by a service provider. Performance based customer incentives are available to assist with costs of implementation.	Low/no-cost operational measures with average payback periods of 1.5 years	Engineering Firms
Business (Commercial and Industrial)				
Prescriptive				
Commercial Food Service ⁴	A statewide program providing non-residential customers a point-of-sale discount on qualifying commercial foodservice measures purchased through a participating supplier.	Discounts are available to customers via participating distributors or manufacturers.	Cooking, refrigeration, sanitation and other equipment	Distributors
C&I Instant Discounts	Business customers receive instant savings via distributors, no incentive application necessary.	Discounts are available to customers via participating distributors.	Lighting, HVAC and fork trucks	Distributors
Small Business	Private small businesses and public facilities with peak demand less than 400 kW.	Opportunities are identified via comprehensive assessment completed by service provider. Incentives are per-unit.	Lighting, lighting controls, HVAC, refrigeration, compressed air and building envelope	Contractors
Standard	Commercial, industrial and public sector customers.	Opportunities are identified via service provider, customer, assessment, or other means. Per unit incentives are available for common energy efficiency improvements.	Lighting, HVAC, energy management, refrigeration, compressed air and more	Contractors (including EaaS, ESCO and Rebate Aggregator)

Business (Commercial and Industrial) Offerings

- **Business Offerings** information
- Learn more about the benefits of becoming a **Business Energy Efficiency Service Provider**

4. Offered jointly by the Illinois utilities (Ameren, ComEd, Nicor Gas, Peoples Gas, and North Shore Gas).

5. Offered jointly by the Northern Illinois utilities (ComEd, Nicor Gas, Peoples Gas, and North Shore Gas).

ComEd Energy Efficiency Program Offerings: Residential

Brief overviews of the ComEd Energy Efficiency **Residential** Program offerings are provided for reference.

Offering	Overview/Customer Segment	Opportunity Identification	Measure Categories	Typical Service Providers
Residential				
Home Energy Savings ^{5,6}	An umbrella program for single family homes, or properties with two units or less, that offers comprehensive retrofits to customers based upon need.	Opportunities are identified via a Home Assessment performed by an offering energy advisor. Projects for qualifying customers are fully funded.	Weatherization, HVAC, water heaters, and health and safety	Contractors
Home Heating & Cooling	Point-of-sale discounts and incentives for residential properties.	Point-of-sale discounts are provided by distributors to trained contractors installing air source or mini split energy efficient heat pumps. Incentives are provided to customers by service providers installing eligible geothermal heat pumps.	Air source heat pumps and mini split heat pumps (distributor) and ground source heat pumps (contractor)	Contractors and Distributors
Multi-Family Energy Savings ^{5,6}	An umbrella program for multi-family properties with three or more units as well as buildings owned or managed by a public housing authority.	Opportunities are identified via comprehensive assessment performed by offering energy advisor. Robust incentives are available. Certain measures may be fully funded for qualifying customers.	Lighting/electric, weatherization, heat pumps, HVAC, boilers, water heaters and health and safety	Contractors
Whole Home Electric	Residential income-eligible single family and multi-family property types as well as buildings owned or managed by a public housing authority. Focuses on converting fossil fueled appliances and heating and cooling systems with efficient electric options.	Opportunities are identified via comprehensive assessment performed by offering energy advisor. Projects for qualifying income eligible single family customers are fully funded. Robust incentives are available for qualifying multi-family property owners and Public Housing Authorities.	Heat pumps, heat pump water heaters, induction cooking ranges, heat pump clothes dryers electrical panel upgrades and weatherization	Contractors
