

📋 Executive Summary

The **Dewey Blockchain System** is a 4-part knowledge architecture for Blacktech Solutions Corp. It combines a **3-Way Mirror** (Google Drive → Internal Drive → GitHub) with an **Immutable Blockchain Audit Trail** that records every file event in a SHA256-chained ledger. A real-time dashboard, security guard, and sync pipeline complete the system.

✓ Chain Valid — 36 Blocks

● Dashboard Live — Port 8104

● Security Guard — Port 8096

🔑 Cloudflare Tunnel Active

📁 Google Drive Synced

📦 GitHub Archive Pushed

🧠 4-Part Architecture

PART 1 — STOREFRONT

🧠 Brain (Google Drive)

Catalog, titles, metadata, and section mirrors. Anyone can browse the storefront — see what exists, but files are locked behind the Internal Drive key.

Dewey Brain/ (Google Drive root)

PART 2 — VAULT

🗄️ Body (Internal Drive)

Actual files — the real content. Key-locked. Only accessible with the unlock key from the pipeline. 27 files across 13 Dewey sections.

/home/allenai/blacktech_brain/

PART 3 — ARCHIVE

📦 Archive (GitHub)

Full mirror + clutter staging. Files go here before permanent deletion — review, then restore or recycle. Complete history preserved.

Hoodtokencom/blacktech-archive

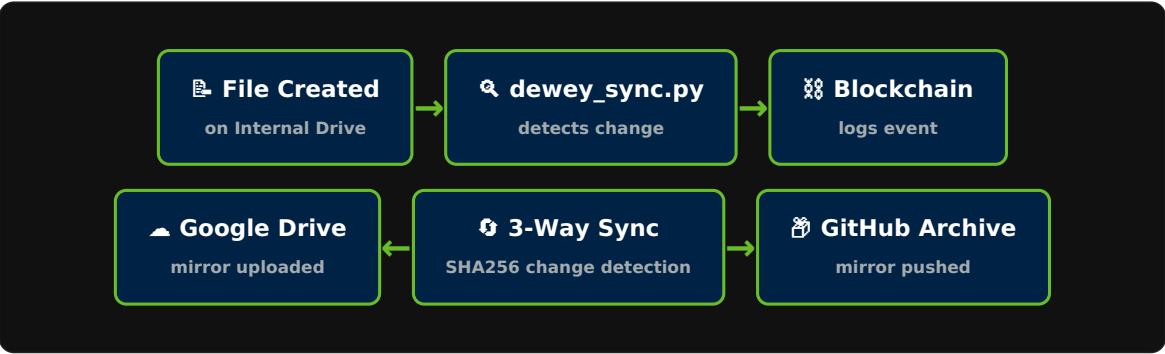

PART 4 — AUDIT TRAIL

🔗 Blockchain (Immutable)

SHA256-chained ledger. Every CREATE, MODIFY, DELETE, and SYNC event is logged with hash verification. 36 blocks, genesis-seeded, fully valid.

000-General/dewey_blockchain.json

 Data Flow Pipeline

 Blockchain Statistics

Metric	Value
Total Blocks	36
Genesis Block	✔ Present — 2026-06-17 12:33 UTC
Last Block	2026-06-17 12:36 UTC
Chain Integrity	✔ VALID — All hashes intact
Sections Tracked	15
CREATE Events	28
MODIFY Events	5
SYNC Events	2
Last Hash	302b36e6ca5383b7

 Live Dashboard

Feature	Detail
Local URL	http://localhost:8104
Public URL	https://blockchain.blacktechsolutionscorp.com
Server	dewey_blockchain_server.py
Auto-Refresh	Every 5 seconds
API Endpoints	/api/chain · /api/stats
Filters	All · CREATE · MODIFY · DELETE · SYNC
Search	By file, section, or action
Status	 HTTP 200 — Live

 Security Guard Dashboard

Feature	Detail
Local URL	http://localhost:8096
Public URL	https://dewey.blacktechsolutionscorp.com
Server	dewey_security_server.py
Access Levels	Public · Key · Approval · Vault (4 tiers)
Tabs	Pending Requests · Audit Log · Permissions · System
Cloudflare Tunnel	✔ Configured in config.yml
DNS Note	⚠ CNAME record needs manual Cloudflare dashboard creation

📁 Dewey Decimal Sections (13 Active)

000	General 14 files
100	Philosophy 1 file
200	Religion 1 file
300	Social Sciences 1 file
400	Language 1 file
500	Science 1 file
600	Technology 1 file
640	Household Favorites 1 file
657	Accounting/Finance 2 files
700	Arts & Recreation 1 file
800	Literature 1 file
900	History & Geography 1 file
999	Decisions & Logs 1 file

🔑 Key Commands

Operation	Command
Full 3-Way Sync	<code>python3 dewey_sync.py</code>
Blockchain Status	<code>python3 dewey_blockchain.py status</code>
Verify Chain	<code>python3 dewey_blockchain.py verify</code>
Search Blocks	<code>python3 dewey_blockchain.py search <keyword></code>
Log Event	<code>python3 dewey_blockchain.py log <ACTION> <file></code>
Search Brain	<code>python3 dewey_pipeline.py search <keyword></code>

Get Unlock Key	<code>python3 dewey_pipeline.py key <entry></code>
Start Dashboard	<code>python3 dewey_blockchain_server.py &</code>

Cloudflare Tunnel Routing

Domain	→	Local Port	Service
blockchain.blacktechsolutionscorp.com	→	8104	Blockchain Dashboard
dewey.blacktechsolutionscorp.com	→	8096	Security Guard
pi.blacktechsolutionscorp.com	→	8096	(shared — legacy)
