

●Dewey Blockchain System – Architecture Schematic

4-Part Knowledge Architecture: Brain · Body · Archive · Blockchain – with 3-Way Mirror Sync, Security Guard, and Live Dashboard

- Google Drive = Storefront (catalog only)
- Internal Drive = Body (real files, key-locked)
- GitHub = Archive (clutter staging, full history)
- dewey_sync.py keeps all 3 identical

●Blockchain Audit Trail

- 36 blocks, SHA256 hash-chained
- Every CREATE/MODIFY/DELETE/SYNC logged
- Genesis block seeded, fully verifiable
- Immutable – append-only, never delete

●Security & Access

- 4 tiers: Public · Key · Approval · Vault
- Fernet-encrypted passcode vault (657)
- Cloudflare tunnel for public access
- Dashboard + Guard on separate ports
